TWENTY-FOURTH ANNUAL REPORT OF THE EXECUTIVE
BOARD OF THE MONTANA STATE INDUSTRIAL SCHOOL
JUNE 30, 1932

TO STATE BOARD OF EDUCATION AND STATE BOARD OF EXAMINERS

GENERAL REPORT

The annual report for the year ending June 30th, 1932 is herewith submitted.

POPULATION

There was an average daily population of one hundred sixty for the year, just one higher than a year ago. There were fifty-nine new boys received; thirty-four boys were returned for violation of parole, only seven of which had been paroled this year. The average age of new boys received was fifteen years and the average length of stay of those paroled was twenty-one months.

DISCIPLINE

The discipline has been uniformly good notwithstanding the fact that many boys had to remain at the school for a considerable time after having earned their release, this on account of conditions of employment. There were no serious infractions of the rules.

HEALTH

Very little sickness has occurred during the year, no serious cases at all. During February there were a few light cases of influenza. Several cases of small pox occurred in Miles City during the spring and it was deemed wise to vaccinate the boys here and this was done.

SCHOOL & SHOPS

A report in detail from the heads of shops department and the school is attached hereto and made a part of this report. Due to employment conditions on the outside as many boys as possible have been put in the shops where they may at least get a start at learning a trade.

FARM & GARDEN

The year just passed was so dry and hot that the showing made on the farms was very poor. The total net profit being about seven thousand dollars less than the previous year, and it was necessary for us to purchase considerable more feed for our livestock than other years. This year conditions are much better and it is very likely that we will be able to reduce our feed bill considerable over the past year. Abundant moisture early, enabled crops to get a good start and both farm and gardens are doing nicely.

IMPROVEMENTS

On July 1st, 1931, Mr. O. W. Fiene of Roundup, Montana, was appointed parole officer for this school. Mr. Fiene had had several years experience as probation officer in his home district and came to us well equipped to establish and carry on this work. The wisdom of the legislature in making provision in the budget for this department is already manifest even though conditions of employment are so very poor. Out of sixty-eight boys paroled during the year but seven of these had to be returned and in most instances this would not have been necessary except for idleness. A good start has been made in the right direction and we are certain that future results will justify the continuance of this very important department.

We were, of course, most disappointed that we were not able to build the new cottages provided for in the bond issue which was declared unconstitutional but have gotten by and will look to the legislature to provide for us when conditions warrant.

MONTANA STATE INDUSTRIAL SCHOOL

Statistical tables are attached hereto showing conditions of finances, movement of population and etc. We are gratified to state, that although our income from interest and income, from sales made was about two thousand dollars under the amount estimated at the time appropriations were made, we lived within our income and have a balance of about one thousand dollars to carry over to next year.

The September meeting of the State Board of Education was held at this institution and we appreciated this opportunity to meet with the Board and show them the school and farms and extend to you a very cordial invitation to hold a meeting here again at any convenient time.

Respectfully submitted,

A. C. Dorr

W. E. Holt

F. R. Savage

Executive Board.

PAROLE DEPARTMENT

I herewith submit my annual report as parole officer for the Industrial School for the period July 1, 1931 to June 30, 1932.

As this is a new department I will explain the duties of the parole officer. The parole officer is in reality the field man for the school. After a boy has been received at our school the parole officer looks up the boy's home, gets acquainted with his parents and gets all the facts in regards to the boy being sent to the Industrial School. The parole officer reports all his findings to the President of the Institution, and by the time the boy is ready to be paroled the President has all the facts surrounding the case and is then much more able to parole the boy to his former home or

to someone else. The boys on parole have to report to the President each month and the parole officer also takes care of this.

After the boy is paroled the parole officer visits the boy as often as possible to find out how he is getting along. These visits are very important and very often encourage the boy.

During the last year we paroled 68 boys. Of this number 7 were returned as parole violators who had been paroled during the last year. In all there were 34 parole violators. It is gratifying to know that only 7 out of 68 were returned under these trying conditions.

I am also glad to report that the boys have been reporting very good during the last year.

At present there are about 239 boys on parole. Eighteen of these live in different states

The parole officer during the last year has made an earnest effort to visit all the boys on parole in this state. Some have only been visited once and a large number of them have been visited five or six times. I am glad to report that the majority of the boys are doing good and are going to make honest and upright citizens in the future.

During the last year the parole officer has traveled over 42,000 miles.

I also wish to report that the parole officer has had very good cooperation with the different county officials and they have always given a helping hand to the boys on parole.

I would also like to thank the President, Mr. Dorr, for the kind cooperation he has given this department.

Respectfully submitted,

O. W. Fiene

Parole Officer

SCHOOL OF LETTERS

Mr. A. C. Dorr, President
Montana State Industrial School

In compliance with your request, I hereby submit to you the Annual Report of the School of Letters, ending May 31, 1932.

All of our children, for the best care, attention, and instruction, are classified into four companies, and are under competent and able men and women who have practically devoted their entire lives to this kind of work, and are working together in sympathy and harmony.

Co. A is composed of the largest and oldest boys, Co. B second in size and age, Co. C the smallest boys and Co. D of the High School boys, and boys who have won the privilege of being in this company by good behavior and conduct.

The Faculty of The School of Letters is composed of three teachers, namely, Geo. H. Estes, Lester Jones, and Mrs Edythe Johnson who are able and competent.

The writer has charge of the Seventh and Eighth grade pupils, coming from Co. A and Co. B the largest and oldest boys of the institution. It must be remembered that our children attend school one half day, and are employed in some other department the other half, thereby giving employment to both mind and hand, enabling them to put into practice the instruction received in the school room, and we consider this a very important feature of our school. The morning school was composed of the Seventh Grade, and during the year, a total of twenty-one pupils were enrolled. At the close of the year all took the State Examinations in Physiology and Geography. Eight passed the test in Physiology, seven passed in Geography, and five passed in both branches. At the beginning of the term

there were only fifteen pupils, the balance coming in at various times during the year. The afternoon school consisted of the Eighth Grade, there being fifteen at the beginning with two recruits added during the term. One boy was paroled during the Christmas Holidays, one ran away, and one was discharged on account of his being twenty one years of age. At the end of the first semester, one passed the State Examinations for the Eighth Grade work. At the close of the term, thirteen wrote the State Examination, six passing very creditably, and seven failed.

The low grades are under the direction of Mr. Lester Jones who teaches the third, fourth and fifth grades during the morning session. During the year there were five in the third grade, five in the forth grade and eleven in the fifth grade, making a total of twenty-one pupils during the entire year. All the third grade pupils were promoted. One boy was passed conditionally in the fourth grade, two failed, one became of age and was released before examination, and one was transferred to Co. C. One boy passed the fifth grade examinations, two were conditioned and six failed. The others were taken out of school to work on the farm, it being considered that farm work would do them more good than school because they were subnormal. The afternoon school was composed of the sixth grade, and was composed of fifteen boys at the beginning of the term, being augmented to twenty-one during the year. Five were promoted to the seventh grade, five were promoted conditionally, and eleven failed.

Co. C, composed of the smallest boys, are segregated from all of the other boys because of their tender age, have a separate schoolroom, work and play to

MONTANA STATE INDUSTRIAL SCHOOL

themselves. Their work is of a very light nature, such as house cleaning, working in the dining room, lawns, and in the kitchen.

These boys have for a teacher, Mrs. Edythe Johnson, a most able, proficient, and competent teacher, and who has a special interest in each child. Indeed, the Management is very fortunate in having such a devoted teacher over these little fellows. There is an old adage which says, "Youth and white paper take any impression." Mrs. Johnson certainly succeeds in putting on the right impression. During the school year, she enrolled forty-one pupils, thirteen in the eighth grade, two in the seventh, two in the sixth, twelve in the fifth, eight in the fourth, and three in the third. The morning school was composed of twenty-three, and eighteen in the afternoon. During the mid-year Examination, two boys graduated from the eighth grade, and seven boys passed their examinations in the studies of Physiology and Geography, making them eligible for the eighth grade next year. At the close of school four boys passed the eighth grade State Examination, making a total of six, eighth grade pupils during the year. Thirty-three were promoted, two conditionally in the lower grades.

This school has a music department. The boys are taught rote singing, memory work, taking two or three lessons weekly. The Text Book issued by the State Department of Education, namely, Fine and Industrial Arts and Music for the public schools has been used, and they have also completed a number of songs, both patriotic and Folk Songs given for the grades. In addition, many Sacred and Popular Songs for Chapel Service and Holidays have been learned. These little fellows certainly sing well, and on many occasions they have

been invited to sing for the churches in the city. A good crowd is always present when these boys are billed to sing.

Last but not least, we would not consider our work complete, without mentioning our High School Boys, of whom we are rightfully proud. Eighteen boys entered High School. One boy was paroled at the close of the first semester. He was on the honor list, and was exempt from all examinations. This boy also took a very prominent part in the High School Orchestra. Two fell on the wayside on account of poor conduct, one failed, the remainder passing with very creditable grades. These boys are permitted to go to and from school unescorted. Six were given the privilege of attending all High School Activities. We fully believe that all the above privileges were duly appreciated. There was only one Senior, and he was permitted to come and go at his leisure.

The writer is very positive in the statement, that no other school in the U. S. accords such privileges.

These boys constitute Co. D with a few others. Six of these boys have private rooms, and are under no restrictions whatever.

Our children have many advantages over the children on the outside, being free from all the allurements, and distractions of the boy or girl on the outside. They have regular hours of sleep, eat regularly good common wholesome food. In addition, they have many recreations such as base ball, foot ball, basket ball, all of which are very conducive to the physical welfare of the child. Not infrequently are our boys able to take a grade higher on the outside than that from which they were promoted while here.

TWENTY-FOURTH ANNUAL REPORT

Our chief aim, and we believe it to be the most important of all, is to mold and fashion our children into good characters. We believe in instilling in them the love of home and country, for we know that if we can do this, we have made good citizens of them, and our country is certainly in need of such material. No country ever rises above its people or constituents. As the people are, so is the nation.

And we would not forget to thank you Mr. Dorr for your unstinted cooperation, and good will in our endeavors.

Respectfully submitted,
Geo. H. Estes
High Grade Teacher

MEDICAL REPORT
Drs. Andrus & Garberson
Miles City, Montana
June 30, 1932

Mr. A. C. Dorr
Superintendent,
State Industrial School,
Miles City, Montana

Dear Mr. Dorr:

I hearwith submit my report as School Physician of the Industrial School at Miles City, Montana, for the fiscal year ended June 30th, 1932.

During the fiscal period just ended thirteen tonsillectomies and eighteen circumcisions were preformed at the school hospital and a number of minor ailments and injuries were attended to at our Clinic.

In addition to these, three patients were removed to the Holy Rosary Hospital as there illnesses were of such a nature that I felt warranted in recommending outside hospital care instead of having them hospitalized at the school hospital. Two appendectomies

were preformed at the Holy Rosary Hospital.

On account of an outbreak of smallpox in Miles City it was deemed advisable to vaccinate the boys at the Industrial School, and it is worthy to note that not one case of smallpox was reported from your institution.

Several visits of inspection to the School and its surroundings revealed excellent sanitary conditions, and the general health of the boys was most satisfactory.

Respectfully submitted,
J. H. Garberson, M. D.

PRINT SHOP

The boys in the Print Shop have completed a very succesful year in the shop, with six different boys receiving some training in this department.

"The Boys' Messenger," a four page paper, is the principal publication, but in addition to this, there are many blank forms used throughout the Institution that are also printed here. One boy from each of the several details writes the happenings of his detail and these are turned into the Print Shop once each month and edited by the Print Shop detail. These detail reports usually fill up about three pages of the paper and the front page is devoted to news of general interest concerning the school and also items of interest in the parole department. We also publish the honor roll and as all parents receive a copy, they are able to see at a glance just how their particular boy is getting along. All boys on parole receive a copy, as well as all county officials and institutions of like nature throughout the United States. A total of about 1400 copies are printed each month.

MONTANA STATE INDUSTRIAL SCHOOL

The Secretary is supervisor of the department; three boys being detailed there at a time. Only boys who have finished the eighth grade are eligible and they must show a willingness for the work, initiative and receive constant training in good English.

All type is set by hand as we do not have enough work for a linotype machine. Many of the boys are able to get work in outside shops after their stay here and find their training highly beneficial.

The following is a work list of the more important items for the year:—

Letterheads	4000
Envelopes	3500
Mailing wrappers	15000
Laundry lists	13000
Order blanks	3500
Report cards	2000
Annual reports	225
Christmas cards	500
Boys' Messengers	16000
Detail blanks	100
Examination papers	75
List of Claims	75
Tailor lists	250
Receipts	100
Special programs	650

Respectfully submitted,

F. R. Greengo

Secretary

SHOE SHOP

The Shoe Shop ended a very successful year June 30th, with the work all caught up and a goodly number of shoes on hand to last the Institution for some time to come.

In the last year, ten boys have been detailed to this department. Of this

number five were able to build a shoe complete in less than a years time; two more will be able to do good work by the time they are ready for release. Two boys, after a trial in the shop, were transferred to other details as they did not seem to be adapted to this kind of work. One small boy was in the shop for a few months to enable him to receive some training in shoe making and was paroled to Bozeman, where he will work in a shoe shop and make his home with his sister.

Three kinds of shoes are made; a work shoe, dress shoe and house slipper. They are built completely of leather. The dress shoe is cloth lined but the work shoe and house slipper are left unlined. All supplies are bought once each year.

In addition to making our own shoes, we also do repairing for the Orphans' Home at Twin Bridges. In this way the boys are kept busy and also insures some source of revenue. We also do all kinds of repairing on any kind of leather goods.

We now have on hand 217 pair of work shoes, 91 pair dress shoes, 168 pair of slippers and 114 uppers and bottoms for work shoes.

We have built, since this time last year, 337 new pair of shoes and repaired 1279 pair; of this number 532 pair were for the Orphans' Home. We have also repaired 101 baseballs and 25 basketballs, besides numerous other items, such as harnesses, halters, binder canvas, pocketbooks, leather jackets, comb cases, etc.

Respectfully submitted,

J. J. Jesperson

Shoe Shop Instructor

TWENTY-FOURTH ANNUAL REPORT

MANUAL TRAINING

At various times we have had about twenty boys detailed to this department in the last year.

The boys are started here at some small jobs and are gradually worked up until they can handle most anything that they are called on to do.

We have lots of outside work to do in the summer time, painting and repair work. In the winter time we study blue prints and apply them to the work we have to do.

The boys are taught to use machinery and tools as well as to take care of them.

The following is some of the major work in the past year:

Repaired, painted and plastered all three floors of boys building.

Wrecked an old building and used the lumber to construct a feed grinding building.

Repaired and painted screens on all the buildings.

Repaired the ice house.

Built concrete curb around the President's residence.

Painted the President's residence.

Painted the Secretary's residence.

Dug well near President's residence for irrigating purposes.

Painted roof of office building.

Painted windows of office building.

Repaired, plastered and painted bath room in office building

Repaired the hog house.

Made two gates for the dairy barn.

Built 50 irrigation boxes.

Made three class room tables.

Patched the roof of boys' kitchen.

Repaired four hay racks.

Built three dish cabinets.

Refinished the desks in the school house.

Built cabinet for Mr. Burgher.

Built medicine cabinet for Dr. Brockway.

Built beet rack for Denby truck.

Put in concrete head gate.

Made double trees for teamsters.

Made spinet desk, magazine racks, telephone stand, sewing cabinets and foot stools for the show room.

Respectfully submitted,

Thos. E. Mason

Carpenter Instructor

TAILOR SHOP

This year has gone along about the same as usual. Each year we try to improve on our work and make the boys look better, so this year we have measured each article of clothing before it is issued. The shirt collars are measured and checked with the boy's measurement. Also each overall, khaki or jean is measured at waist, inseam and outseam and is either altered or changed to fit the boy. That has helped considerably because the pants and shirts shrink even if the material has been shrunk before being made up.

Another improvement is the pressing. All shirts and parts are pressed and folded neatly and put in each individual locker until issued on Saturday.

Another improvement in our work is the drafting of patterns. We have drafted a complete set of patterns for khaki and jean pants, and each parole pants has a pattern drafted to the boy's measurements. This insures a better fit than before, because it is seldom that two boys have the same measurements. We draft our own vest pattrns also when we make a vest to a suit. Most of the suits are merely the coat and trousers because the boys never wear the vests when they get out. However, I allow my tailors a choice of two pair of trousers or a vest.

MONTANA STATE INDUSTRIAL SCHOOL

We can draft coat patterns but we do not use them. We have a set of block patterns and alter them as needed.

This year I have been able to procure several magazines on tailoring which are a great help to the boys, especially "The Progressive Tailor" and "American Gentleman and Sartorial Art Journal." We are very glad to get these and wish more would be sent to us.

Year's Press List

Suits	106	White aprons	25
Extra coats	15	Striped aprons	168
